

Isabelle Tjahja

Oceanside, CA | 626-382-9144 | Iztjahja@gmail.com | [Portfolio](#)

Skills

Frontend Development

- Proficient in **React JavaScript** and **TypeScript**, building responsive frontend UI components and scalable frontend architectures.
- Built and refined UI elements using **HTML** and **CSS**, improving usability, visual consistency, and overall frontend quality.

Backend Development

- Well-versed in **C#** and **SQL** for backend services, developing reliable APIs and managing database design.
- Proficient in **Java** for backend development, implementing maintainable, object-oriented solutions.

Tools

- Efficient with **MySQL** and **Azure DevOps** for data management, deployment workflows, and project tracking.

Professional Experience

Full-Stack Software Engineer

July 2024 - Dec 2025

IntelliEvent

Remote

- Led R&D standardization efforts, strengthening **REST API** reliability, and accelerating automated testing creation by 80% with GitHub AI Copilot.
- Orchestrated 30+ PR reviews weekly and debugging efforts, applying SOLID principles to improve automation quality, technical documentation, and regression lifecycle management.
- Collaborated with senior engineers on high-priority projects and time critical hotfixes, enhancing system reliability and reducing downtime.
- Managed **CI/CD** pipelines in Azure DevOps to run automated regression tests across multiple services with centralized logging.
- Coordinated with clients weekly to translate user feedback into iterative, compliant software enhancements aligned with operational workflows, contributing to \$1M+ in revenue growth.

Software Engineer Intern

May 2024 - Jul 2024

IntelliEvent

Riverside, CA

- Modernized application architecture by migrating the frontend to **ReactJS** and separating frontend and backend into distinct UI and API layers, cutting system load times by 50%.
- Refactored translation class to ensure seamless, reliable operation of the software's translation module.
- Rapidly evaluated and enhanced 100+ **HTML/CSS** projects, improving usability and enforcing UX consistency.
- Appointed to lead development efforts on the newest software version, collaborating with cross-functional teams to implement and test key features.

Education

California Baptist University

Riverside, CA

BS in Computer Science
